

# PTW Safety Checklist No. 42

## TEST RUN MOTORS, ENGINES AND EQUIPMENT

<b>Other Checklists that may be relevant:</b>		<a href="#">18</a>
<b>Permit Number:</b>		<b>Date:</b>
<b>Rev 2.0</b>	<b>Issue Date:</b> 13/12/2017	<b>Authorised By:</b> PSM

**NOTE:** For motor rotation checks, consideration must be given in order of preference to:

- (a) Waiting until all permits have been returned and isolations removed;
- (b) Use a phase rotation meter.

If the above are not practical, then use this checklist.

- |                                                                                            | Y                        | N | N/A                      |
|--------------------------------------------------------------------------------------------|--------------------------|---|--------------------------|
| 1 All permits not associated with the test run are to be cancelled or suspended.           | <input type="checkbox"/> |   |                          |
| 2 Consider implications on driven equipment if unable to be disconnected from prime mover. | <input type="checkbox"/> |   | <input type="checkbox"/> |
| 3 PI authorizes the following test run deisolations:                                       |                          |   |                          |

PI Signature: \_\_\_\_\_

Step	Deisolation	Deisolation		Reinstatement	
		Done by	Checked by	Done by	Checked by

- 4 If isolations are not being reinstated, ensure master isolation is updated.
