

Environment Policy

Our vision

“We will operate in an environmentally responsible manner”

We believe that:

- Our environmental commitments are an integral part of our day to day activities.
- We can have a positive impact on our operating environments.
- We are responsible for having good environmental practices.
- Environmental stewardship is the responsibility of all Employees.

To achieve this we will:

- Ensure that no business objective will take priority over the environment.
- Maintain and continually improve our Health, Safety and Environmental Management System.
- Proactively identify hazards and unsafe behaviours and take steps to manage them to as low as reasonably practicable.
- Accurately report and learn from our incidents.
- Set targets for improvement and measure, appraise and report on our performance.
- Continually review opportunities to improve our environmental performance.
- Ensure Employees have the necessary training, skills, knowledge and resources to fulfil their environmental responsibilities.
- Design, construct, and maintain our assets, and manage our operations, with the goal of preventing environmental incidents.
- Efficiently use our natural and physical resources.
- Comply with all relevant environmental laws.
- Encourage our business partners and contractors to demonstrate the same commitment to achieving excellence in environmental performance.

A handwritten signature in black ink that reads 'Henry Tait'.
